

The Comprehensive Nutritional Program (CNP for short), is a testable way to know what supplements you need and if those supplements are working for you.

CNP is a verifiable way of documenting how healthy you really are, not just how you “feel”! CNP can monitor the diseases you already have and give a clue to where you are headed.

Wouldn't it be better to stop these problems before they progress into something serious?

Starting with a consultation, Dr. Horn will determine the testing to be done. Using blood work and other diagnostic tools, we do an in-depth analysis of you! The testing will tell us where the problem areas are occurring, or just developing.,

First, you will have a detailed history and review with Dr. Horn to see if you qualify. Second, based upon your history he will order blood work from the laboratory. This is very thorough and will include at least Fifty (50) different values. The blood draw is from a standard laboratory such as LabCorp. Third, we do a toxic metal screening from one of the most reliable labs in the country. Fourth, we will perform a urinalysis in the office to see if there is any infection and or kidney problems you may not even be aware of. Fifth, you will receive a take home stool kit to screen for blood. Sixth, everything will be put together in a detailed a personalized report. This report will give you explanations as to the cause of your problems and directions on supplements, foods, lifestyle changes, exercise and more. You will have scheduled retesting to monitor your progress!

Because of our dedication and desire to help patients improve their life, we have worked very hard to provide this level of testing, analysis and reporting at a substantial saving to you. Dr. Horn has negotiated special pricing with the laboratories to offer this entire package to you. *This is an outstanding value to start improving your life.*

Don't delay, don't depend on others to make you well. Take the first step towards enjoying the freedom of good health for life!

*Look better, feel better, be better™*
